

Product Specification Sheet

Mid-America Vinyl Custom Shutters Style L4 Louvered Window Shutters

This guide is intended to help answer any questions about specific dimensions of the vinyl decorative shutters you will receive. Please note that the custom plastic shutter manufacturing process is not exact. All sizes are nominal and may vary slightly from one shutter color to the next.

If you are installing your vinyl window shutters in a cavity or next to an obstruction and you require an exact shutter width, we recommend that you call us for an exact width measurement before ordering custom shutters for your home, as sometimes the actual shutter width is slightly wider than what is specified.

Stiles

Shutter Width	Stile Width
5 3/4"	1"
8", 9 1/4", 11", 12", 13", 14 1/2", 16 1/2"	2"

Shutter Width	Bottom Rail Height
All Widths	4"

Shutter Depth (Thickness): 1"

Shutter Louvers (Top and Bottom)

Louver Height	Bullnose Width
Approx. 1"	1/8"

Product Specification Sheet

Mid-America Vinyl Custom Shutters Style L4 Louvered Window Shutters

Available Widths: 5 ¾", 8 ½", 9 ¼", 11", 12", 13", 14 ½", 16 ½" and 18"

Available Heights: From 18" to 144" in ¼" increments

The position of the mullion is adjustable for L4 style vinyl shutters. You may specify the height from the top of the decorative shutter to the top of the mullion to the nearest 1" increment. Note that the mullion height is 3", so if you need to align the center of the mullion to the center of your window mid rail, measure from the top of your window to the center of your window mid rail and then subtract 1 ½". However, note that most people align the top of the window mid rail with the top of the mid rail of their vinyl shutters.
