Mid-America Custom Window Shutters Style L3 Louver Vinyl Shutters

This guide is intended to help answer any questions about specific dimensions of the vinyl exterior shutters you will receive. Please note that the custom exterior vinyl shutter manufacturing process is not exact. All sizes are nominal and may vary slightly from one shutter color to the next.

If you are installing your exterior vinyl shutters in a cavity or next to an obstruction and you require an exact shutter width, we recommend that you call us for an exact width measurement before ordering custom exterior shutters, as sometimes the actual exterior shutter width is slightly wider than what is specified.

Product Specification Sheet

**Mid-America Custom Window Shutters
Style L3 Louver Vinyl Shutters**

Available Widths: 5 ¾", 8 ½", 9 ¼", 11", 12", 13", 14 ½", 16 ½" and 18"
Available Heights: From 18" to 144" in ¼" increments

For L3 style shutters, the mullion position is adjustable. You may specify the height from the top of the vinyl shutter to the top of the mullion to the nearest 1" increment. Note that the mullion height is 3", so if you need to align the center of the mullion to the center of your window mid rail, measure from the top of your window to the center of your window mid rail and then subtract 1 ½". However, note that most people align the top of the window mid rail with the top of the mid rail of their vinyl shutters.
